

FPL Services.

Energy efficient and sustainable solutions for local government

City and County Government Facility Expertise

FPL Services, LLC (FPLS) goes above and beyond to meet the unique high-performance needs of government facilities. Service isn't just part of our name, it is what our customers depend on from FPLS. As a total energy solutions provider using industry leading energy expertise, operational discipline, and innovative technology, our customers consider FPLS an invaluable resource for developing energy management plans to save money, improve efficiencies, and reduce consumption.

With more than 20 years of success in developing and delivering turn-key energy and water conservation systems, FPLS combines the innovation of NextEra Energy Inc., with the operational discipline of an ESCO who has never missed a savings guarantee. As a part of the NextEra Energy family of companies, FPLS is backed by more than 80 years of energy leadership from Florida Power & Light Company and the financial strength of NextEra Energy, one of the nation's largest providers of electricity-related services and America's number one provider of solar and wind energy.

FPL Services.

Partnering with cities and counties to identify, quantify, and deliver guaranteed energy savings.

Experienced Energy Services Provider

FPLS has been delivering energy savings expertise for more than two decades – even before the inception of the state and federal regulations governing this economical approach to installing energy-efficient equipment, water conservation measures, and other upgrades. With a strong commitment to excellence in delivery, FPLS helps clients save energy and money, with programs designed to lower operating costs, while becoming better stewards of the environment.

Our Expertise Includes

- » Energy and water saving measures
- » Renewable energy generation
- » Mechanical and electrical upgrades
- » Distributed generation
- » Building automation
- » Maintenance programs
- » Project and construction management
- » Design and Engineering
- » Project commissioning
- » Measurement and Verification (M&V)

Guaranteed Energy Savings

FPLS offers performance based guarantees as a way to help maintain or reduce your O&M budget, while upgrading your facilities. FPLS has never missed a savings guarantee – securing repeat business with more than 60% of our customers.

FPLS savings can include:

- » Limited/no capital expenditures
- » Annual energy cost savings
- » Investment recovered through savings

Renewables

FPLS combines renewable energy technologies with energy efficiency measures to provide government facilities with long-term, sustainable solutions. Whether it's a stand-alone renewable energy project or a comprehensive energy efficiency package incorporating renewable technology, FPLS handles every aspect of the project from the designing and engineering to the installation, commissioning, operation, and maintenance. We'll help you determine the most effective and compatible renewable energy solution to fit your facilities and meet your renewable generation objectives.

Proven Performance

Customers give us high marks for our commitment to performance, the innovative and customized solutions we design, and our ability to understand the unique needs of every project.

The FPLS reputation for proven performance is based on:

- » A track record of long-term customer satisfaction
- » Project and vendor neutrality – we use the best and most cost-effective solutions for your facility
- » Measurement and Verification (M&V) expertise
- » A strong renewable portfolio
- » Innovative solutions utilizing the latest technology
- » Never missing a savings guarantee

Industry Recognition

- » U.S. Department of Energy ESPC award winner
- » U.S. Army Corps of Engineers ESPC award winner
- » NAESCO accredited Energy Services Company
